PROFESSIONAL SUMMARY

AI Engineer and Full Stack AI Developer focused on building scalable multimodal AI systems, GenAI applications, and AI-powered SaaS platforms. Experienced in developing production-ready applications using FastAPI, Next.js, LangChain, LangGraph, vector databases, and modern AI infrastructure. Skilled in AI orchestration, RAG pipelines, real-time streaming systems, and hybrid local/cloud AI deployment.

PROJECTS

afsGPT — Multimodal AI Assistant Platform

[Next.js, FastAPI, Firebase, LangChain, ChromaDB, Ollama]

- A multimodal AI assistant with voice AI, RAG, web research, image intelligence, and multi-provider AI routing.
- Supports OpenAI, Gemini, Claude, Groq, OpenRouter, and Ollama for hybrid local/cloud AI inference.
- Includes real-time streaming responses, vector retrieval pipelines, image generation, implementation of GenAI, persistent chat history, and Firebase authentication.
- Deployed using Vercel and Render with scalable cloud architecture.

TRIPZ-AI — Multi-Agent AI Travel Platform

[Next.js, FastAPI, LangGraph, PostgreSQL, Redis, Mapbox]

- A multi-agent AI travel platform focused on itinerary generation, budget optimization, and intelligent route planning.
- Uses LangGraph and asynchronous FastAPI pipelines for adaptive AI workflow orchestration.
- Integrated weather APIs, maps, PDF itinerary export, and multilingual recommendation workflows.

Pathfindr.ai — AI-Powered EdTech ERP Platform

[Next.js, Node.js, Express.js, Firebase, Gemini AI]

- An AI-powered EdTech ERP platform helping tutoring institutes launch customized learning portals within minutes.
- Uses Gemini AI for personalized career recommendations and adaptive student learning roadmaps.
- Includes dynamic task generation, assessments, internship recommendations, and scalable B2B onboarding workflows.
